

ABSTRACT OF THE DISCLOSURE

There is provided an information processing apparatus that makes it possible to supply power only for a function desired by the user. A CPU causes a display unit to display a plurality of functions of the information processing apparatus in a manner being selectable. Information on at least one function selected from the plurality of functions via a screen displayed by the display unit is input. The CPU controls power supply relating to the input at least one function, based on the information on the at least one function.
